Company- specific description
The issue of climate change is receiving ever increasing attention worldwide. The possible effects, as described in various public accounts, could include changes in rainfall patterns, water shortages, changing storm patterns and intensities, and changing temperature levels that could adversely impact our costs and business operations and the supply and demand for our fertilizer, garden soils and pesticide products. In addition, fluctuating climatic conditions may result in unpredictable modifications in the manner in which consumers garden or their attitudes towards gardening, making it more difficult for us to provide appropriate products to appropriate markets in time to meet consumer demand. Because of the uncertainty of weather volatility related to climate change and any resulting unfavorable weather conditions, we cannot predict its potential impact on our financial condition, results of operations and cash flows.

Company-specific description
We are investing in resource-efficient products, such as smart irrigation controllers; drip irrigation technology; and gardening inputs that allow gardeners to use less water and inputs to achieve the same results. As water and energy resources become scarcer and more expensive and weather patterns continue changing in unpredictable ways, we are committed to adapting by providing consumers with the products that will enable them to grow successfully and minimize negative environmental impacts.

C4.2

(C4.2) Provide details of other key climate-related targets not already reported in question C4.1/a/b.

C4.3

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.
No

C4.3d
(C4.3d) Why did you not have any emissions reduction initiatives active during the reporting year?

Upon completion of the previous goal period, we began preparing for a new ESG planning process, including full materiality assessment, which is now underway.

C5. Emissions methodology

C5.2

(C5.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate Scope 1 and Scope 2 emissions.

C6. Emissions data

C6.1

(C6.1) What were your organization’s gross global Scope 1 emissions in metric tons CO2e?
